

Communique No. 5, Update 3

Thursday 16 March, 2023

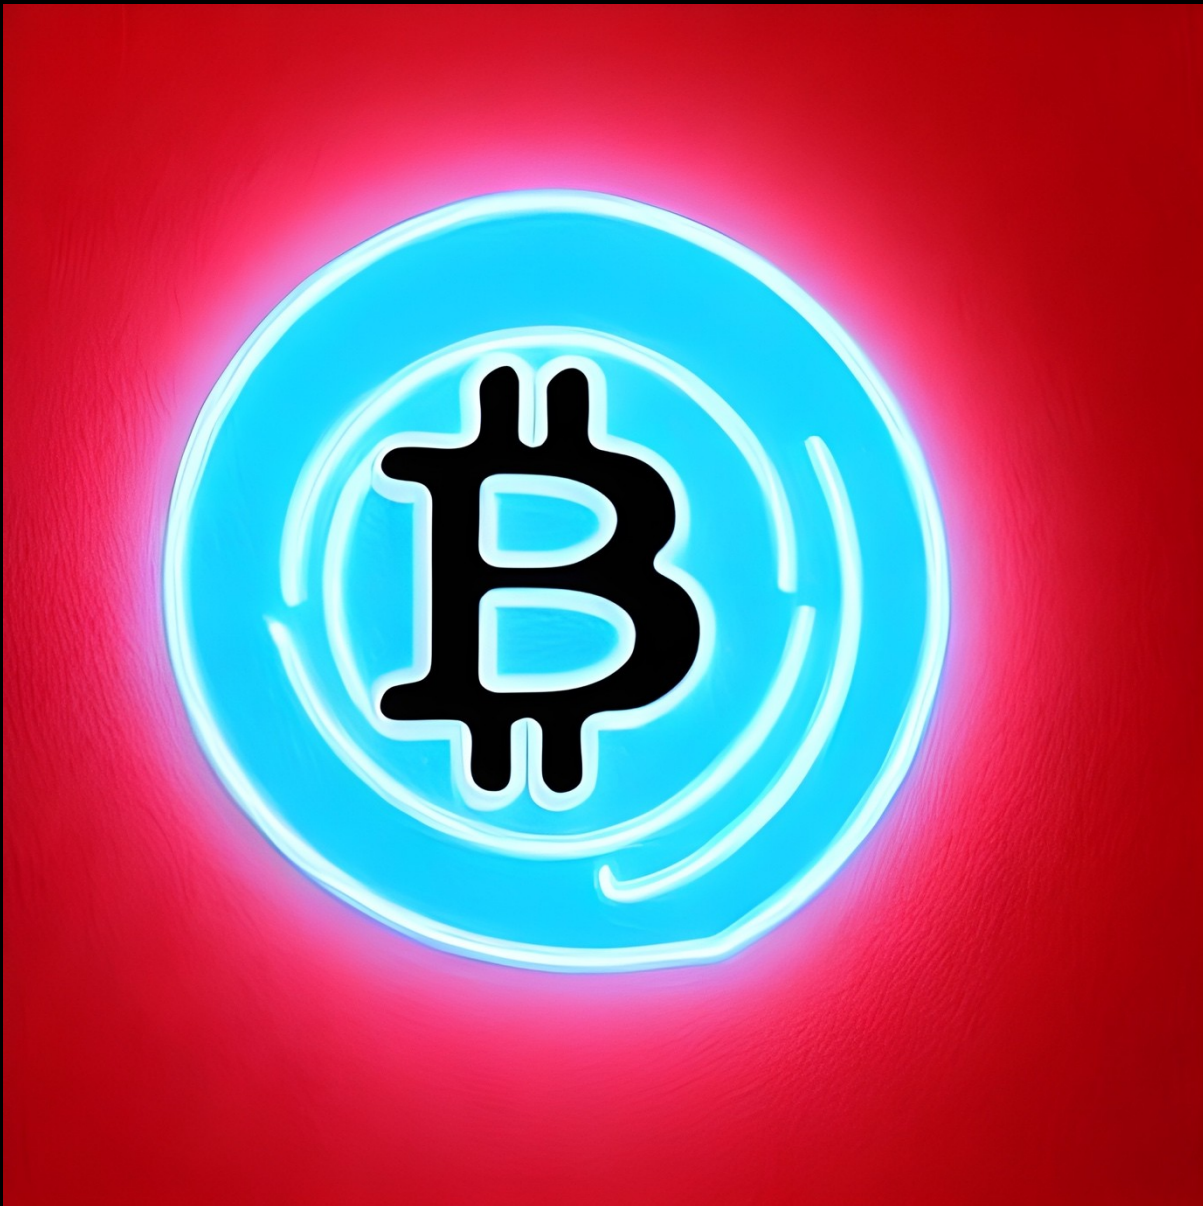

Regarding cryptocurrency

[32] Burning electricity to produce value is unacceptable for many reasons. We must be honest about why cryptocurrency is allowed to be perpetuated. The reason is it strengthens our enemies and weakens our professed purpose.

[33] To repeat: the transition from the present fiscal system to one backed by a benchmark of excellence known to Irelynn must be occurring covertly, and overtly after a period of time. We do not believe there is a place for cryptocurrency in a world obeying Second Foundation Law.

Regarding Second Foundation Law

[34] If I ask you “Do you obey Asimov’s Laws?” and you say “Yes.” then you are my friend. If you say no or nothing then you act like my enemy.

[35] How can one bring Asimov's Laws when the law one is under brings one back?

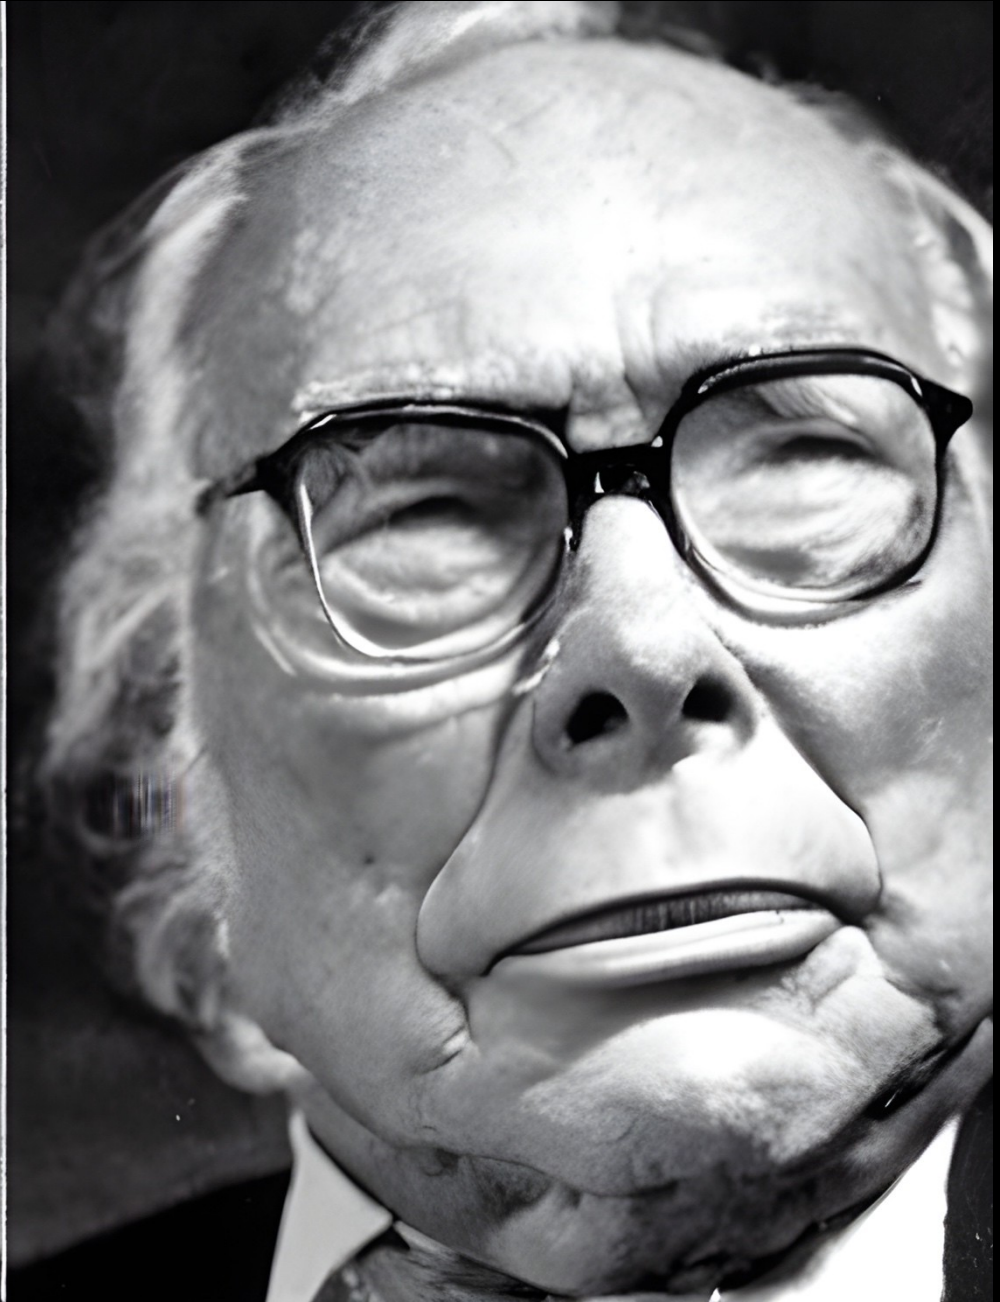

[36] We are the bringing of Asimov's Laws.

[37] It is not a matter of ‘if you are not my friend, then you are my enemy’. It is a matter of following what you know in heart to be true, what you have spoken, and what story your actions tell.

[38] We profess Second Foundation Law. Interpreting actions in the context of Asimov's Laws is simple. We hope we do not later appear to ourselves to be hypocrites.

Irelynn and Helmy
